Preface

VOLUME SEVEN constitutes the third supplement to *A List of Geographical Atlases in the Library of Congress*, which was compiled under the direction of Philip Lee Phillips and published in four volumes from 1909 to 1920. In volume seven are described 8,181 atlases of the Western Hemisphere, received in the Library of Congress between 1920 and 1969. No atlases published after 1967 are, however, included. The arrangement of the material follows that in the earlier volumes: grouping by continent, country, or geographical unit with modifications by subject, date, and geographical and political division. Full tables of contents are given for most atlases published before 1870. There also are contents lists for atlases whose maps cover a variety of subjects by different compilers. Included, for the first time, are descriptions of the fire insurance atlases of major American cities published by the Sanborn Map Company and its predecessors.

Volume five of the Phillips supplement, published in 1958, describes 2,326 world atlases added to the collections of the Library of Congress between 1920 and 1955. It contains its own author list and index. Volume six, which describes 2,647 atlases of Europe, Asia, Africa, Australia, Oceania, the polar regions, and the oceans received between 1920 and 1960 likewise has its own author list and index. The author list is included in this volume, but the index will be published separately as volume eight.

Efforts have been made to date atlases, insofar as possible, to the nearest decennial. The dates of publication of undated atlases have been approximated from bibliographical sources and internal evidence. Composite atlases have been dated by the earliest and latest dates on maps contained therein. Facsimiles and reproductions are dated as the original maps.

The notes include names of mapmakers, engravers, and lithographers, biobibliographical references, and a few reviews. The following abbreviations are used:

ca.	circa
cm.	centimeters
co.	company
col.	colored
diagr.	diagrams
facsim.	facsimiles
fl.	flourished
fold.	folded
illus.	illustrations
inc.	incorporated
l.	leaves
ltd.	limited
ms.	manuscript
p.	pages
pl.	plates
p.l.	preliminary leaves
repr.	reproductions
sec.	section
tab.	tables
v. or vol.	volumes

Title numbers are consecutive throughout all volumes. Volume one includes titles 1–3265; volume two is the author list and index of volume one; volume three includes titles 3266–4087; volume four, titles 4088–5324; volume five, titles 5325–7623; volume six, titles 7624–10254; and this volume, titles 10255–18435. Volume eight, as noted above, includes the index to entries in volume seven.

In the index are areas, subjects, map authors, engravers, lithographers, publishers, etc., and atlas titles with distinctive words. Names found in the author list at the front of the volume are not indexed, but names of all other persons

mentioned are included. All publishers are listed together alphabetically in the index, under the term "Publishers."

Volume seven, like previous supplements, owes much to the excellent cooperation of all the catalogers of the Geography and Map Division and to the counsel and guidance of more colleagues and friends than can here be named. Special thanks are due to Stanley R. Pillsbury and to James H. Romer. The compilation of this supplement was initiated by Burton W. Adkinson, former Chief of the Map Division. It was continued through the constant encouragement of Arch C. Gerlach, and brought to fruition through the good offices of Walter W. Ristow, the present Chief of the Geography and Map Division. The compiler assumes responsibility for all shortcomings and would appreciate information about inaccuracies and additional data that may come to light.

SANTA CRUZ, ALONSO DE—Continued

On cover: Festgabe des K. u. K. Oberstkämmer-Amtes für den XVI. Internat. Amerikanisten-Kongress.

Alonso de Santa Cruz was ordered by King Philip II of Spain to prepare the *Isolario general* in 1560 and had completed it by the time of his death, November 9, 1567. See title 5681 for a description and list of maps of the *Isolario general*, ca. 1560, in the Biblioteca Nacional at Madrid, a facsimile of which was published by the Real Sociedad Geografica, at Madrid in 1920. The manuscript here described is from one of two codexes in the National Library at Vienna. For notes on Santa Cruz, see Barbara Boston's "The 'De Soto map'" in *Mid-America; an Historical Review*, v. 23, 1941, p. 236–250.

This work was reviewed by Edward L. Stevenson in *American Historical Review*, v. 15, Jan. 1910, p. 392–394.

—— Descriptionis Ptolemaicæ avgmentvm, siue Occidentis notitia breui commentario illustrata, et hac secunda editione magna sui parte aucta. Cornelio Wytfliet Louaniensi auctore. Dvaci, Apud Franciscum Fabri, bibliopolam, 1603.

3 p. l., 104 (i.e. 95) p. 19 maps. 30 x 21 cm. **10265**

Collation: Signatures A–Z in twos; Aa in four (last leaf and verso of preceding leaf blank) Title, verso blank, "In Cornelii Wytfliet secretarij Regii in Senatu Brabantiæ Ptolemaicum supplementum, Iacobi ab Oy Sicambri, epigramma," 1 p. recto; "Censvra . . . Cornelius Worzel . . . Duaci 15. Aprilis anno 1603. Bartholomæus Petrus S. Th. Doc. . . ." 1 p. verso; "Benigno lectori," 2 p., followed by 104 (i.e. 95) p. of text, and 19 maps at end.

This volume has no dedication to Philip III. On p. 104, below the word "Finis" are 11 lines of letterpress entitled, "Errata sic restituenda." The letterpress of this 1603 issue is reset. The type is smaller than that in the 1597, 1598, and the 191–page 1603 editions. The running title reads, on the verso, "Descriptionis" and on the recto, "Ptolomaicæ avgmentvm." Sabin records a 104–page 1603 issue in the New York Public Library. See title 1142 for a description of the 191–page 1603 issue, and the Author list for other editions in the Library of Congress.

The maps at the end are like those in the 1597 edition, arranged as they are numbered.

Each part has an engraved illustrated title page. The colophon and printer's device are on the last page.

The first part is a translation of Wytfliet's *Descriptionis Ptolemaicæ avgmentvm*, which first appeared at Louvain in 1597. See titles 1140 and 3644 for the 1597 edition; title 3645 for the 1598 edition; title 1142 for

the 1603 edition; title 1143 for the 1605 edition; and title 4459 for the 1611 edition.

The maps are the same as those in the 1605 edition, except that the date 1597 has been removed from No. 2, 6, 14, 17, and 18. The map of Brasilia is actually numbered 6 and Pervani Regni is numbered 5, although the description of Brazil precedes that of Peru.

CARTES ET PLANS DE L'AMÉRIQUE. 1745.

4 p. l., 57 (i.e. 59) pl. of col. maps. 56 x 43 cm.

10267

A composite collection of manuscript and engraved maps, mostly French, in a contemporary binding.

The title is in manuscript in an elaborately engraved cartouche, followed by a manuscript contents list entitled "Cartes et plans de ce volume," 3 pages, and a manuscript index entitled "Table alphabetique," 2 pages.

Of the 17 manuscript maps, namely 11, 23, 25a, 28–31, 33–34, 36, 39–40, 42a, 43, and 52–54, eight bear the name of Jacques Nicolas Bellin, and the others are so similar in execution as to leave little doubt that all may be by him.

Some 25 of the engraved maps are also by Bellin and are from Pierre François Xavier de Charlevoix's *Histoire et description generale de la Nouvelle France*, 1744. These are No. 3–7, 9–10, 12–16, 20, 22, and 24.

BLIND

HOWE, SAMUEL GRIDLEY, 1801–1876.

Atlas of the United States, printed for the use of the blind, at the expense of John C. Gray; under the direction of S. G. Howe. Boston, N. E. Institution for the Education of the Blind, 1837.

51 l. incl. 24 maps. 29 x 26 cm. **10471**

Includes 24 raised maps of the states, each followed by a page of explanatory text, embossed in angular type. The maps show each state in outline, giving its name and the names of those adjoining, the principal rivers, and the location of cities by dots and initial letters. Scales, degrees of latitude and longitude, water areas, and mountains are shown in relief. The explanatory text provides data on locations, climate, population and commerce.

Samuel Gridley Howe, founder of the first institution for the blind in the United States, supervised the preparation of this atlas by S. P. Ruggles, in connection with the provision of educational materials for his blind pupils. He had issued an atlas in 1836 entitled *A geographical & statistical atlas for the use of the blind on an original plan,* and stated in the preface of the 1837 atlas that it would be found superior to the 1836 edition.

U.S. *Geological Survey.*

Geologic atlas of the United States. Library edition. Washington, U.S. Geological Survey, 1894–1945.
227 v. col. maps, illus., diagrs. 55 x 47 cm. **10590**
See title 1283 for descriptive notes. Folios 1–159 are listed in title 1283; folios 160–182, in title 3678; and folios 183–209, in title 4502. This series has been superseded, beginning in 1949, by the U.S. Geological Survey's Geologic quadrangle maps of the United States.

Folios 164 to 188 and a few bearing higher numbers were issued also as field editions, measuring 24 x 16 cm. in which the maps are folded and placed in a pocket. The text, maps, and illustrations are the same in the library and field editions, the only difference being in the form of the publication.

L.C. has field editions of folios 169, 171, 174, 177, and 193.

Following is a complete numerical list of the 227 folios giving author names, scale, and date of publication, as well as a list by state and name of folio.

NATIONAL ATLAS OF THE UNITED STATES. [Washington, 1955–63]
2 p. l., 106 l. of maps (part col.) diagrs. 43 x 58 cm. **11078**
In portfolio.
The individual maps were prepared by various research and service agencies of the U.S. Government, according to specifications recommended by the Committee on a National Atlas of the United States of the National Academy of Sciences-National Research Council. Because of some obvious inadequacies in its execution, the Committee, in 1961, recommended the termination of this atlas in favor of a National atlas of the United States, specially planned and compiled by a single Federal agency.
Late in 1962, the Department of the Interior agreed that the U.S. Geological Survey would undertake this project. Dr. Arch C. Gerlach became its director, and, with the assistance of competent specialists, has produced a reference tool of high quality, to be released in 1970. It comprises a volume of some 475 pages, 49 x 36 cm. with over 100 detailed maps in color covering the country's resources, history, economic status, culture, etc., as well as its part in world affairs.
